## Cluster Enrichment Program

### Drama for all
Are you a budding actor? Do you love making up plays, working in teams and performing? Then this is the Cluster Activity for you! During our time together we will create impromptu pieces, look at ways to present poetry and work on a group play which we will perform at the end of the term. I'm looking forward to meeting a brand new group of actors. I know we'll have loads of fun together.

**Location:** Colonel Light Gardens

### Visual Arts
To all the budding artists out there! Do you love creating masterpieces? This activity will give you the opportunity to explore different styles of art. You will work with a wide range of mediums, including paint, charcoal, watercolours, pastels and more.

**Location:** Goodwood

### Textile Technology
Students will be engaged in the Design and Technology learning area, specifically in Home Economics - Textile Technology. This exciting program ‘Stitching Stories & Threading Tales’ will provide them with an introduction to a range of knowledge and skills in the textile area. They will actively be learning about different fabrics, natural fibers, working safely in textile technology, how to use and store equipment correctly and safely, the process and technique of wet felting and how to stitch a variety of embroidery stitches.

**Location:** Kingswood

### Sports Science
Focusing on physical fitness, cardio respiratory endurance, muscular endurance, flexibility and strength. Learning about the body and performing various fitness tests to measure your own fitness, such as the beep test, vertical leap, sit and reach and many more.

**Location:** Kingswood

### Musical Maestros
Are you a budding musician and have would like to learn an instrument? Students in this enrichment will learn how to play the Ukulele. All levels of musical skill can be catered for.

**Location:** Kingswood

### Race The Clock
Students participate in a number of races that require a combination of walking and jogging, locating and collecting data, map reading, orienteering, working collaboratively and the ability to make safe, fast and responsible decisions. The route each week will vary in degree of difficulty and incorporate a slight increase in distance.

**Location:** Kingswood

### Emergency Responders
Students will explore and research first aid/emergency responses for a variety of situations. They will role play scenarios, speak first hand with emergency responders (Incursions: e.g. paramedics, firefighters, etc.), view multimedia demonstrations, design first aid action plans, create evacuation maps, locate community first aid courses, and learn to be leaders amongst their peers.

**Location:** Colonel Light Gardens

### Robotics
Have you ever wondered about how robotics work or why we need them in today’s world? If so join the Robotics team to design, make and appraise a robot using Lego Mind storms.

**Location:** Kingswood

### iCreate iBooks
Draft and write your own books using iBooks Author. You will have the opportunity to write both fiction and non-fiction books. You can then illustrate your book and bring it to life using video, drawings and images.

**Location:** Goodwood

### ICT Explore
Create your own interactive animations, video games and art using ‘Scratch’. You will learn computer programming ideas, while also learning to think creatively and work together. Other computing activities include using ‘Sketch Up’ to produce 3D models.

**Location:** Goodwood

### Dance
The Dance program will involve both partner and individual work. We will be working on refining basic dance steps which will then involve learning a routine ready to perform. We will focus on a Hip-Hop and a Jazz routine with maybe some Contemporary, getting these up to performance standard. Each lesson will begin with a warm up and end with a cool down. You will need to bring your drink bottle and a great attitude in readiness to get dancing!
